

Difference between Japanese and American educational system

Kumamoto Kita High School

Abstract

We researched about "Class style".

We focused on the differences between America and Japan.

Background

Class style different depending on the country

• In America

- teach according to students levels
- To emphasize individual opinion

• In Japanese

- Aiming the same level
- Silent especially during discussion or presentation

Purpose

- To know what is the difference between Japan and American educational system
- To find how to solve the problems in the Japanese
- For the good future of the educational

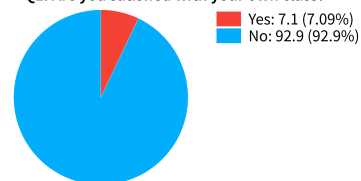

How to research

- Conducting the survey about the class by questionnaire
- Comparing the results of the survey
- Integrate the results of the survey
- Finding the problems and the solutions to make our class more effective

Result

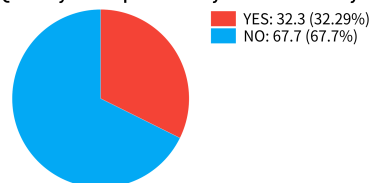

• Teachers in Japan

Q1. Are you satisfied with your own class?

• Students in Japan

Q1. Can you ask questions to your teachers freely?

Consideration

- Most of the teachers in Japan aren't satisfied with their class
- Students can't ask teachers freely in Japan
- Different policies created different class style

Conclusion

- Although the survey is still in progress, we were surprised to find that the current results are different from what we expected. There were many responses that we did not predict and they were all very interesting. We believe it is important to discuss the results of the survey with the group as a group and reflect each person's opinion when finalizing the results.
- Based on the results of this survey, our group will discuss, compare, and consider why this has happened.
- Think about how to apply what you have learned in the conclusion and present how to improve the future of education
